

## Hook and Fly size

There is a restriction on the size of hook and size of fly that can be used at Ackers, Taylor's lake and Broad Oak lake. The maximum permitted hook size and overall length of fly is stated below.

The hook measurement of 5/8" is equivalent to a standard size 10 hook.

**Each of the venues has a gauge in the returns box!**

It is the responsibility of members to ensure that their flies conform to the stated size. Bailiffs will be checking so make sure that your flies are legal before you fish.
